DETAILED ACTION

Application Status

1. Claims 31-43 are pending by virtue of Applicant's preliminary amendment filed on February 19, 2002 (Paper No. 4).

Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:
 - I. Claims 31-43, drawn to polynucleotides encoding cysteinyl-tRNA synthetases related to SEQ ID NO:10, chimeric genes, host cells, plants seeds, and methods for transforming host cells, classified in class 435, subclass 471.
 - II. Claims 31-43, drawn to polynucleotides encoding cysteinyl-tRNA synthetases related to SEQ ID NO:12, chimeric genes, host cells, plants seeds, and methods for transforming host cells, classified in class 435, subclass 471.
 - III. Claims 31-43, drawn to polynucleotides encoding cysteinyl-tRNA synthetases related to SEQ ID NO:14, chimeric genes, host cells, plants seeds, and methods for transforming host cells, classified in class 435, subclass 471.

3. The inventions are distinct, each from the other because of the following reasons:

Groups I-III drawn to polynucleotide encoding cysteinyl tRNA synthetases from various plants. Each Group is classified identically. However, these Groups are distinct, each from the other, by virtue of their distinct structures. Each SEQ ID NO has a different structure that is unrelated, except via the function of the enzyme they encode, to the others. No consensus

Art Unit: 1652

sequence describing the Groups is disclosed or claimed. Moreover, these enzymes as encoded by the polynucleotides from different sources are only described in the instant specification using their structures; in other words, there is no description of cysteinyl tRNA synthetases from plants having particular characteristics in common, such as pI, catalytic activity values, etc. Thus, each of these enzymes and the polynucleotides encoding them, as defined by their structures, is patentably distinct from the others. Moreover, a search of any two of the Groups would be undue considering not only the entirely distinct structure search that would not overlap whatsoever, but also the entirely distinct textual search in the non-patent literature which search would include the enzyme name and/or activity and the source. Thus, Groups I-III are patentably distinct, each from the other.

Election

4. A telephone call was made to Thomas Rizzo on September 23, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. § 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(i).

Conclusion

5. A complete response to the instant Office action must include an election of invention to be examined.
